

BROOMFIELD OPEN SPACE, TRAILS, PARKS AND RECREATION Needs Assessment Survey 2002

Some Definitions . . .

The City and County's Master Plan has established some definitions that will be important to keep in mind during the planning process.

Open Lands are public and private lands acquired or preserved in the public interest. Open Lands include Park/Recreation Areas and Open Space.

Park/Recreation Areas are the most intensively developed and used types of Open Lands. They may include active recreation and cultural uses, play structures, irrigated turf and landscaping, hard surface areas and buildings.

Open Space Areas are parcels intentionally protected from development, and set aside for unstructured recreation and the appreciation of natural surroundings. They typically include water resources, wetlands or floodplains, scenic areas, critical wildlife habitat, native flora or fauna, productive agricultural lands, or cultural/historic resources.

MARKING INSTRUCTIONS:

- Use a No. 2 pencil or black ballpoint pen.
- Please do not use a felt tip pen.
- Make solid marks that fill response completely.
- Erase cleanly any marks you wish to change.
- Please do not make any stray markings on this form.

POLICY ADVICE ON OPEN SPACE, PARKS, RECREATION & TRAILS

8. A variety of actions might be proposed to manage the use of Broomfield open space, parks and trails. Please indicate your level of support for each below.

- Require and strictly enforce dogs on leash in Broomfield parks and open space
- Provide fenced areas within parks for dogs to run off-leash
- Increase visibility of law enforcement
- Increase park maintenance
- Fence open space to prohibit vehicular access while allowing pedestrian/bike access
- Limit public access to critical wildlife habitat and natural areas
- Improve weed management in open space

9. Would it be acceptable to you to have recreation areas, such as large areas of athletic fields, serve as buffers between Broomfield and adjacent communities?

- Yes No Don't know

10. There are several types of properties which can be targeted in an open space acquisition/preservation program. For each type of property listed below, please tell us if you think it is very important, somewhat important, probably not needed, or definitely not needed. If you feel neutral or uncertain, please indicate.

- Sensitive environmental areas such as wetlands
- Agricultural lands maintained as working farms with controlled public access
- Archaeological or historic sites
- Scenic lands
- Potential trail corridors
- Buffers between Broomfield and adjacent communities
- Lands accommodating both passive recreational uses and wildlife habitat
- Wildlife habitat such as prairie dog colonies, raptor nesting areas, etc.
- View corridors
- Wildlife and migration corridors
- Ditches and drainageways

11. Following is a statement about prairie dogs that has been voiced in past news media reports and at public hearings. Please tell us if you agree or disagree with the statement below concerning prairie dogs.

The public and private sectors have a responsibility to relocate prairie dogs as an alternative to eradication when new development is proposed on a site.

12. When prairie dog populations are controlled, there are several methods that can be considered. One is to use captured prairie dogs in endangered species programs such as feeding them to black-footed ferrets or feeding them to birds of prey in raptor rehabilitation programs. Another method is to relocate prairie dogs at a typical cost of about \$100 to \$200 per prairie dog (if Broomfield has to contract for the service) with about 50% to 75% of them typically surviving relocation. (This cost can also be close to nothing if volunteers are used.) A third option is to poison prairie dogs at a cost of about \$2 to \$8 per prairie dog. Please tell us to what extent you support or oppose each of these options listed below for controlling prairie dog populations. If you neither support nor oppose, please indicate as neutral.
